

ADM for Safe and Safer Soaring

A review and preview of soaring in Northern Arizona highlighting some of the element that may impact soaring operations. Factors include performance planning considerations with considerations for density altitude for takeoff and inflight operations, oxygen use considerations, and airspace alerts and other airspace users.

Directions: In the conference center

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
